Product experience pulse

Survey ID: product-experience-pulse | Version: 1.0.0 | Estimated time: 3 minutes

Purpose: Measure task outcome and perceived ease for a recent product task so the team can identify experience regressions and diagnostic follow-up needs.
Audience: People who attempted the target task in the product within the past 7 days.

Before you begin

Participation is voluntary. You may skip optional questions or stop at any time.

Your recent experience

1. What happened the last time you tried to complete this task?

ID: task_outcome | Type: single_choice | Required

( ) I completed it [completed]
( ) I completed part of it [partial]
( ) I did not complete it [not_completed]
( ) I am not sure [not_sure]

Rationale: Establishes the behavioral outcome for the focal episode.
Analysis use: Report completion distribution and use it to interpret ease.

2. How easy or difficult was it to complete as much of the task as you did?

ID: task_ease | Type: rating | Required

1	2	3	4	5	6	7
Very difficult			Neither easy nor difficult			Very easy

Rationale: Measures perceived ease for the same focal episode.
Analysis use: Primary experience metric; report the full distribution and compare by task outcome.

3. What was the main obstacle, if any?

ID: main_obstacle | Type: single_choice | Optional

( ) No obstacle [none]
( ) I could not find what I needed [could_not_find]
( ) The instructions were unclear [instructions]
( ) Something did not work as expected [technical]
( ) I did not have the information I needed [information]
( ) It took more time than I had [time]
( ) Another obstacle [other]

Rationale: Provides a structured diagnostic for the primary outcome.
Analysis use: Report shares among respondents who encountered an obstacle and compare with ease.

4. What is one change that would have made this task easier?

ID: improvement | Type: textarea | Optional

_____
_____
_____
_____

Rationale: Collects focused diagnostic detail without requiring a long response.
Analysis use: Code themes and connect them to outcome and ease; do not treat theme counts as population prevalence without context.

Close

5. May the research team invite you to a separate follow-up study?

ID: future_research | Type: single_choice | Optional
( ) Yes [yes]
( ) No [no]
( ) Not sure [not_sure]
Rationale: Obtains permission for future contact without collecting contact data in this survey.
Analysis use: Use only with an approved external contact linkage process.

Thank you

Thank you for sharing your experience.
